📍 Taguig City, PH

PROFESSIONAL SUMMARY

Software Developer with 3 years of hands-on experience delivering full-stack features in production enterprise systems. I work across the entire stack, React frontends, ASP.NET Core APIs, and relational databases, owning features from ticket to deployment within an agile team. Outside my day job I build and ship my own projects end to end, most recently an AI-powered lead automation system on self-hosted n8n, deployed on Railway and Vercel.

PROFESSIONAL EXPERIENCE

Junior Software Developer

Stack: C#, ASP.NET Core, React, TypeScript, Node.js, PostgreSQL, SQL Server, Prisma, Redis, Docker

eData Services Philippines, Inc. | 2023 - Present

- Owned end-to-end implementation of assigned features across multiple internal enterprise systems: UI components, API endpoints, business logic, and database work within an agile scrum team.
- Built and maintained RESTful APIs using ASP.NET Core with Entity Framework Core and PostgreSQL / SQL Server, including request validation, error handling, optimized SQL queries, and stored procedures.
- Developed frontend features using React and TypeScript with component libraries (MUI, Mantine), form validation (React Hook Form + Zod), and server state management (TanStack Query).
- Contributed to a platform rebuild from a legacy .NET Framework / MVC5 system to a .NET 10 / React 19 stack using MediatR, Vertical Slice architecture, and Redis caching.
- Implemented role-based access control, audit logging, and workflow rules across modules to improve security and traceability.
- Investigated and resolved production issues by analyzing application behavior, logs, and database records.
- Built AI-facing features including a prompt configuration module governing per-entity AI settings tied to transcription templates, and a rebuilt AI worker monitoring view with live state indicators.

PROJECTS

AI Lead Intake & Follow-Up Automation

Solo Project · github.com/sharm-rvrs/lead-intake-automation · bloomstudio-leads.vercel.app

- Built an end-to-end lead automation pipeline: a Next.js form feeding self-hosted n8n workflows that validate, dedupe, and classify inquiries with an LLM, reply via Gmail OAuth2, log to an Airtable CRM, and notify Discord.
- Implemented webhook secret authentication, two-layer validation, and safe LLM output parsing with fallbacks so no lead is lost to a bad AI response.
- Designed a scheduled follow-up workflow with status-based idempotency; deployed to production on Railway (n8n, Docker) and Vercel.

PDF Matching System

Solo Project · github.com/sharm-rvrs/matching-app

- Document automation pipeline: Playwright scraping of JavaScript-rendered jail rosters, PDF name extraction and matching, LLM document classification, and automated email alerts (Next.js, TypeScript).

DNGJ Corporation Website

Freelance Client Project

- Marketing website for a Philippine engineering and construction firm, delivered solo from design direction to production deployment (Next.js, TypeScript, Tailwind CSS, Framer Motion).

GainLog

Personal Project · github.com/sharm-rvrs/workout-app · my-gainlog.vercel.app

- Full-stack fitness tracker with LLM-powered coaching, Supabase auth, and progress analytics (Next.js, TypeScript, PostgreSQL).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Python

Frontend: React, Next.js, Vite, Tailwind CSS, Material UI (MUI), Mantine, TanStack Query, Zustand, React Hook Form, Zod

Backend and APIs: ASP.NET Core Web API, .NET Framework, MediatR, Entity Framework Core, Prisma, SignalR, Node.js, Bun

Databases: PostgreSQL, Microsoft SQL Server, MySQL, Redis

Automation and Integration: n8n, webhooks, REST API integration, Airtable API, LLM APIs, Gmail API

Auth and Security: Keycloak (OpenID Connect / OAuth2), JWT Bearer, Role-Based Access Control

DevOps & Infra: Docker, Docker Compose, GitHub Actions, .NET Aspire, Railway, Vercel

Concepts: Vertical Slice Architecture, RESTful API Design, OOP, Agile Scrum, SDLC

Tools & Platforms: Git, Figma, Unity

ADDITIONAL EXPERIENCE

Social Media & Ads Management

Mangrae · Freelance / Family Business

- Manage Facebook Business Page and Ads Manager for a small business: create ad sets, run paid promotions, and monitor ad performance.
- Create post graphics and captions, and maintain Facebook Messenger's automated reply messages to keep responses timely and on-brand.

EDUCATION

STI College Las Piñas | 2019-2023

Bachelor of Science in Computer Science
Cum Laude

AMA Computer College (Naga Campus) | 2017-2019

Senior High School - ICT (TVL)
With Honors

CERTIFICATION & SEMINARS

Microsoft Azure AI Fundamentals

Microsoft

Foundational C# with Microsoft

Microsoft

Python Essentials 1 and 2

Python Institute

HCIA-Cloud Service
